DIGITALIZATION SERVICES - PUBLIC SAFETY

In our digital age, public safety departments and emergency management agencies face challenges in adapting to the transformation and emergence of technology. Community Awareness and Safety Education could be the deciding factor that increases or decreases the security of our stakeholders. SparkC provides safety outreach and digital safety services to provide agencies with a variety of outreach solutions.

Digital Safety is the use of digital technology to promote, present, and enhance the presentation of safety knowledge, emergency management, and community awareness. We provide public safety departments with the tools to enhance their digital presence on campus, social media, and Title IX emergency communication requirement.
