ARE YOU CYBER SECURE?

In today's dynamic competitive business environment, protecting proprietary and sensitive data from cyber threats is a constant challenge. An organization's reputation depends on its ability to stay ahead of emerging cyber threats and mitigate risk. Over the past decade, the demand for faster, secure, and integrated online systems and technologies has grown exponentially. Organizations across a myriad of industries in today's modern market, depend heavily on their online presence to conduct business.

The SparkC team understands the importance of protecting the online platforms used to transmit, process and store regulated sensitive information. The emergence of social media applications has only broadened the threat landscape utilized to attack systems and data. Our team of experts will identify vulnerabilities, mitigate risk, and monitor for emerging threats, while your internal resources focus on your organization's mission.

A Trusted Partner of Qualified Professionals

Qualified information security staff are hard to find and difficult to keep. And operating your own 24/7 security operations center (SOC) can be expensive. On its own, your IT team can be overwhelmed with the constant stream of alerts they face when working with network security, threat detection, and breach prevention. SparkC and our Managed Security Service Provider (MSSP) partners help you stay on top of security alerts.

Our cyber-security management services include:

- Virtual Security Operations Center (SOC) support
- Penetration Testing
- Vulnerability Assessments
- Risk Management Support
- Cyber-Hygiene Training Support (CMMI/NIST/FISMA focused)

A Trusted Team of Certified Professionals

- Certified Information Systems Security Professional (CISSP)
- EC-Council Certified Security Analyst (ECSA)
- Certificate of Cloud Security Knowledge (CCSK)
- CompTIA A+
- GIAC Certified Enterprise Defender (GCED)

PAST PERFORMANCE

VA | U.S. Department of Veterans Affairs

ALF Module Development, Hosting & Application Development
Contract#: 36C10X21P0119 08/21 - 3/23
SparkC provided Risk Assessment & Management support to the Office of Acquisition and Logistics (OAL). The scope consisted of conducing a Risk Assessment on various software applications that were set to be deployed across all web applications within the VA internal environment.

Quarterly Vulnerability Scanning & Assessments
Contract Timeframe: 01/22 - 12/22
Ankura, Inc requested SparkC to deliver vulnerability assessment and scanning services for the year 2022. Service components included automated quarterly scanning, vulnerability reporting, ASV reports for PCI compliance, prioritization of vulnerability threats, online remediation recommendations, and false positive submissions.

MANAGED SECURITY OPERATIONS CENTER (SOC) SUPPORT
AS A SERVICE

SparkC Managed Detection and Response (MDR) services, provide a cost-effective alternative to in-house threat prevention. Outsourcing the expertise required to run a security operations center utilizes the framework and methodologies for centralized threat hunting, investigation, mitigation and containment, resulting in reduced time between detection and mitigation.

The SparkC team of cyber-security experts perform event triaging to identify threat priority, and determine appropriate mitigation strategies. We provide our MDR clients with real-time access to information on risk, vulnerabilities, remediation activities, configuration exposures, and compliance status. Our centralized reporting services provide executive leadership with an accurate visualization of their organization's risk and overall security posture.

MANAGED SECURITY OPERATIONS CENTER (SOC) SUPPORT SERVICE COMPONENTS

- 24/7 Platform Support
- Vulnerability Insight Support
- Quality Alert & 15-Minute Escalation SLA
- Full Network Visibility
- Emerging Threat Response
- Expert Log Review
- Continuous Threat Hunting
- Hybrid Asset Discovery
- Internal & External Vulnerability Scanning

- Endpoint Detection
- File Integrity Monitoring
- Network Monitoring
- Cloud Service Integration
- Web Log Analytics
- Log Collection & Search W/ 12-Month Retention

TEAM CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- EC-Council Certified Security Analyst (ECSA)
- Certificate of Cloud Security Knowledge (CCSK)

- Microsoft Certified Systems Engineer (MCSE)
- CompTIA A+
- GIAC Certified Enterprise Defender (GCED)

SparkC

PENETRATION TESTING

Penetration testing services deliver simulated cyber-attacks against an organization's computer systems to identify exploitable vulnerabilities. The SparkC team of qualified pen testers will measure the overall cybersecurity strength of your organization by employing offensive tactics, and providing findings with recommendations for prioritization of remediation efforts.

Services Features:

- Asset Discovery
- Automated and Manual Target Enumeration
- Manual Exploit Validation
- Comprehensive Reporting
- Remediation Recommendations

VULNERABILITY ASSESSMENTS & RISK MANAGEMENT SUPPORT

Vulnerability Assessment and Risk Management play a crucial role in preventing data breaches and unauthorized access to computer systems. The SparkC Vulnerability Scanning team offers On-Premises and Cloud compliance services that identify the top risks facing our clients' systems, including patch management gaps, poor configuration management, and remote access vulnerabilities.

Services Features:

- Automated Quarterly Scanning
- Unlimited Re-Scans
- Vulnerability Reports
- ASV Reports for PCI compliance
- Vulnerability Prioritization
- Remediation Recommendations
- False Positive Submission

CYBER-HYGIENE WORKFORCE TRAINING

Protecting your organization's assets starts with training the personnel who act as your first line of defense. Tailored, client-specific Security Awareness training modules provide a cost-effective tool for educating staff about the strategies used by cyber attackers, and prepare employees to guard against a potential intrusion. Our experienced cyber team works strategically with our clients to identify risk areas and vulnerabilities, and provide custom training modules tailored to your current threat landscape. SparkC provides secure portal access for clients via our virtual training environment.

Cyber-Hygiene Training Offerings

- Customized Policy-to-Practices Training Module
- Active Threat Debrief Training
- Security Awareness Training
- Corporate Training Program Implementation
