INTERNAL/EXTERNAL VULNERABILITY SCANNING & ASSESSMENTS

Internal and External Vulnerability Scanning and Assessments play a crucial role in preventing data breaches and unauthorized access to computer systems. The SparkC Vulnerability Scanning team offers On-Premises and Cloud compliance services that identify the top risks facing our clients' systems, including patch management gaps, poor configuration management, and remote access vulnerabilities.

Vulnerability Scanning & Assessments service components:

- Perform PCI security compliance and risk assessment; provide remediation steps to meet compliance requirements.
- Review wireless network system components for security vulnerabilities, validating system specific configurations and known exploits.
- Validate system-specific configurations and review for known exploits. This includes firewalls, switches and routers, Microsoft Active Directory and file servers, web servers, wireless routers, VPN, Cisco VoIP and Office 365 Email. Assess the HCDI's external and internal network security and architecture.

PAST PERFORMANCE

ankura

Internal/External Quarterly Vulnerability Scanning & Assessments
Quarterly Vulnerability Scanning & Assessments
