VULNERABILITY ASSESSMENTS & RISK MANAGEMENT SUPPORT

Compliance assessments and audits are essential to sustain the viability of a system and to avoid violating the law while meeting statutory, regulatory, security, and contractual obligations. While some organizations aim only to meet minimal compliance requirements, more and more companies today are choosing to address compliance from a strategic perspective. SparkC guides organizations to take a proactive approach to build a comprehensive set of capabilities in security and availability that can lead to cost savings and performance improvements.

Our cyber-security management services include:

- Automated Quarterly Scanning
- Unlimited Re-scans Until Passing
- Vulnerability Reports
- ASV Reports for PCI compliance
- Prioritization of Vulnerability threats
- Online remediation recommendations
- False Positive submission
